

# Cybercrime

## Part One

1. What is cybercrime?
2. Watch the following video, <https://youtu.be/-roeOODc8L4>, to learn three English compound nouns related to cybercrime.
3. Can you remember any recent cyber-attacks?

## Part Two

### ■ Read the following definitions and decide which words or expressions they describe.

1. This is a type of malicious software that threatens to publish the victim's data or perpetually block access to it unless a ransom is paid.
2. To gain unauthorized access to data in a system or computer
3. This activity will involve some degree of infringement on the privacy of others or the damaging of a computer-based property such as web pages, software, or files.
4. In computing, this is any skilled computer expert who, with their technical knowledge, uses bugs or exploits to break into computer systems.
5. A dishonest way to make money by deceiving people; a fraudulent or deceptive act or operation; a dishonest scheme; a fraud.
6. A person who does the act in 5 (above).
7. This is any type of offensive action employed by nation-states, individuals, groups, or organizations that targets computer information systems, computer networks, and/or personal computer devices by various means of malicious acts usually originating from an unknown source that either steals, alters, or destroys a specified target by getting into a weak computer system.
